

We often receive requests from our users on how to locate data needed for the Affirmative Fair Housing Marketing Plan, or AFHMP. These users are preparing this plan and they aren't sure of the best way to go about accessing the data that is required for it. The good news is that all of the data needed on race and ethnicity, disability status, and the number of families with children under the age of 18 can be found through data.census.gov. Let's find out how.

To start, using Google Chrome, go to data.census.gov and click on the Advanced Search button.

For this example, I want to find data for Miami-Dade County, Miami city, the Miami metropolitan statistical area, and census tract 10.02 in Miami.

Let's start with selecting Miami-Dade County. Click on Geography > County > Florida > scroll down and check the box next to Miami-Dade County, Florida.

The screenshot shows the United States Census Bureau website interface. The top navigation bar includes 'ALL', 'TABLES', 'MAPS', and 'PAGES'. Below this is a 'FIND A FILTER' search bar. The main content area is divided into several sections: 'BROWSE FILTERS' on the left, 'GEOGRAPHY' in the center, and 'WITHIN (STATE)' and 'FLORIDA' on the right. In the 'BROWSE FILTERS' section, 'Geography' is selected. In the 'GEOGRAPHY' section, 'County' is selected. In the 'WITHIN (STATE)' section, 'Florida' is selected. In the 'FLORIDA' section, 'Miami-Dade County, Florida' is selected. The 'Selected Filters' section at the bottom shows 'Miami-Dade County, Florida' and 'Geography'. Buttons for 'CLEAR FILTERS', 'SEARCH', and 'SHOW' are at the bottom right.

I also need data for tract 10.02 in Miami, so I'm going to move back over to the Geography column and select tract > Florida > Miami-Dade County > and then scroll down and check the box next to Census Tract 10.02, Miami-Dade County, Florida.

The screenshot shows the United States Census Bureau website interface with additional selections. The 'BROWSE FILTERS' section remains the same. In the 'GEOGRAPHY' section, 'Tract' is selected. In the 'WITHIN (STATE)' section, 'Florida' is selected. In the 'WITHIN (COUNTY)' section, 'Miami-Dade County, Florida' is selected. In the 'MIAMI-DADE COUNTY, FLORIDA' section, 'Census Tract 10.02, Miami-Dade County, Florida' is selected. The 'Selected Filters' section at the bottom now shows 'Miami-Dade County, Florida', 'Geography', and 'Census Tract 10.02, Miami-Dade County, Florida'. Buttons for 'CLEAR FILTERS', 'SEARCH', and 'SHOW' are at the bottom right.

To find Miami city, move back over to the Geography column, scroll down and select Place > Florida > click directly on the magnifying glass icon located in the upper corner of the column and use the resulting search bar to search for Miami. Once it pulls it up, check the box next to Miami city, Florida.

The screenshot shows the United States Census Bureau data tool interface. At the top, there is a search bar with the text "Search". Below the search bar, there are tabs for "ALL", "TABLES", "MAPS", and "PAGES". The "FIND A FILTER" section contains a search bar with the text "e.g. 336111 - Automobile Manufacturing".

The "BROWSE FILTERS" section on the left has a "Geography" tab selected. The "GEOGRAPHY" section on the right has a "Place" tab selected. The "WITHIN (STATE)" section on the right has a search bar with the text "Miami" and a list of states. The "Florida" state is selected, and the "Miami city, Florida" option is checked.

The "Selected Filters" section at the bottom shows three filters: "Miami-Dade County, Florida", "Census Tract 10.02, Miami-Dade County, Florida", and "Miami city, Florida".

Lastly, I want the Miami metropolitan statistical area. To find this, move back over to the Geography column, scroll down a little bit more and select Metropolitan Statistical Area/Micropolitan Statistical Area and use the magnifying glass icon again to search for Miami. The first option that comes up for us is for Miami, Oklahoma, which we definitely don't want. Underneath that one, though, there are two options for Miami—the Miami-Fort Lauderdale-West Palm Beach, FL Metro Area and the Miami-Fort Lauderdale-Pompano Beach, FL Metro Area. So how do we know which one of these MSAs to use?

The screenshot shows the United States Census Bureau website interface. At the top, there is a search bar with the text "Search". Below the search bar, there are tabs for "ALL", "TABLES", "MAPS", and "PAGES". A "FIND A FILTER" section contains a search box with the text "e.g. 336111 - Automobile Manufacturing". On the left, under "BROWSE FILTERS", the "Geography" filter is selected and highlighted with a red box. In the "GEOGRAPHY" section, the "Metropolitan Statistical Area/Micropolitan Statistical Area" option is selected and highlighted with a red box. To the right, a search results dropdown menu is open, showing a search for "Miami". The first result is "Miami, OK Micro Area", which is not selected. The second result is "Miami-Fort Lauderdale-West Palm Beach, FL Metro Area", which is selected and highlighted with a red box. The third result is "Miami-Fort Lauderdale-Pompano Beach, FL Metro Area", which is also highlighted with a red box. Below these, there are several other options, including "Miami, OK Micro Area" and "Miami-Fort Lauderdale-West Palm Beach, FL Metro Area". At the bottom, there is a "Selected Filters" section showing three filters: "Miami-Dade County, Florida", "Census Tract 10.02, Miami-Dade County, Florida", and "Miami city, Florida". To the right of the filters are buttons for "CLEAR FILTERS", "SEARCH", and "SHOW".

It's important to keep one thing in mind, particularly when you are looking at MSAs. It's not unheard of for an MSA to be redefined from one year to the next. Since there are two options provided here and both are for Miami, it would seem that this was the case—at some point, the Miami MSA must have been redefined. In these cases, if you don't know the correct MSA to use for the year of data that you're looking at, the safest bet is to use all of the options that are available. Since we don't know which MSA is the correct one that we should use, we'll play it safe and check the boxes for both the Miami-Fort Lauderdale-West Palm Beach, FL Metro Area and the Miami-Fort Lauderdale-Pompano Beach, FL Metro Area. Now we have all of the geographies that we need selected.

The screenshot shows the United States Census Bureau website interface. At the top, there is a search bar and navigation links for ALL, TABLES, MAPS, and PAGES. Below this is a 'FIND A FILTER' section with a search input field containing 'e.g. 336111 - Automobile Manufacturing'. On the left, under 'BROWSE FILTERS', the 'Geography' category is selected. The 'GEOGRAPHY' section on the right lists various levels of geography, with 'Metropolitan Statistical Area/Micropolitan Statistical Area' highlighted. A dropdown menu for 'Miami' is open, showing a list of geographies. Two options are checked and highlighted with a red box: 'Miami-Fort Lauderdale-West Palm Beach, FL Metro Area' and 'Miami-Fort Lauderdale-Pompano Beach, FL Metro Area'. At the bottom, the 'Selected Filters' section shows four filters: 'Miami-Dade County, Florida', 'Census Tract 10.02, Miami-Dade County, Florida', 'Miami city, Florida', and 'Miami-Fort Lauderdale-West Palm Beach, FL Metro Area'. There are buttons for 'CLEAR FILTERS', 'SEARCH', and 'SHOW'.

Before I go any further, I want to explain that there are three tables that can be used to find all the data required for the AFHMP. Two of these are data profile tables released by the American Community Survey, or ACS. They are DP02 and DP05. The other, B11004, is a detailed table released by the ACS.

Since we already know the table IDs for the tables we need, we can use a shortcut to get all three tables at once. I'm going to navigate to the search bar at the top of the screen and click on it. Then enter 'DP02 DP05 B11004' just leave a space between the table IDs. Once I've entered this here, and I've confirmed that I have all five of the geographies selected as filters, I'm going to hit the Search button found at the end of the search bar.

The screenshot shows the United States Census Bureau search interface. At the top, the search bar contains the text "DP02 DP05 B11004" and a "SEARCH" button. Below the search bar, a list of filters is displayed: "Miami-Dade County, Florida", "Census Tract 10.02, Miami-Dade County, Flor...", "Miami city, Florida", and "Miami-Fort Lauderdale-West Palm Beach, FL Me...". The "Geography" filter is selected, and a list of geographic areas is shown, including "Miami, OK Micro Area", "Miami-Fort Lauderdale-West Palm Beach, FL Metro Area", and "Miami-Fort Lauderdale-Pompano Beach, FL Metro Area". The "Metropolitan Statistical Area/Micropolitan Statistical Area" filter is also selected, and a list of areas is shown, including "Miami-Fort Lauderdale-Pompano Beach, FL Metro Area -- In metropolitan or micropolitan statistical area -- not in principal city", "Miami-Fort Lauderdale-Pompano Beach, FL Metro Area -- In metropolitan or micropolitan statistical area -- urban", "Miami-Fort Lauderdale-Pompano Beach, FL Metro Area -- In metropolitan or micropolitan statistical area -- rural", and "Miami-Fort Lauderdale-Pompano Beach, FL Metro Area -- In metropolitan or micropolitan statistical area -- in principal city". The "Selected Filters" section at the bottom shows the same four filters. The "SEARCH" button is located at the bottom right of the interface.

This will bring up all three tables— DP05, ACS Demographic and Housing Estimates, DP02, Selected Social Characteristics in the United States, and B11004, Family Type by Presence and Age of Related Children Under 18 Years.

CUSTOMIZE TABLE

Columns | Cell/Column Notes

Now that we're using the 5-year estimates, we can see that we now have data for tract 10.02, we also still have data on the other three geographies we selected.

DP05 is the source table for the race and ethnicity data. If you scroll down the table, you'll come to the Race section. This portion provides data for all of the race groups that are needed—White, Black or African American, American Indian or Alaskan Native, Asian, and Native Hawaiian and other Pacific Islander.

Next let's find the data for the percent of people with a disability. This is what we will pull from the other data profile table, DP02. From the left side of the screen, click on the table title to view this one. Since we selected the 2019 5-year estimates for the other table, this one now defaults to the 5-year estimates. If we scroll about halfway down the table to the Disability Status section and we look under the Total Civilian Noninstitutionalized Population with a disability, we can see that the estimate for this is 10.1% for Miami-Dade County.

Under 6 years and 6 to 17 years	4,003	±519	0	±19	
6 to 17 years only	15,253	±981	36	±42	
No related children of the householder under 18 years	34,372	±1,340	24	±36	
▼ Female householder, no spouse present:	161,303	±2,718	978	±195	
▼ With related children of the householder under 18 years:	88,386	±1,924	533	±132	
Under 6 years only	16,000	±1,076	131	±88	
Under 6 years and 6 to 17 years	16,095	±939	142	±101	
6 to 17 years only	56,291	±1,710	260	±121	

In order to get the percent of families with children under the age of 18, we'll have to do a little bit of calculating. First, we need to find the total number of families with related children of the householder under 18 years. To do this, take the number from the third line for married couple families with related children of the householder under 18 years and add that to the number from the tenth line for families with a male householder, no spouse present, with related children of the householder under 18 years. Then, using the number from the sixteenth line for families with a female householder, no spouse present, with related children of the householder under 18 years, add that to other two numbers. You should be left with a single number that represents the total number of families with related children of the householder under 18 years.

CUSTOMIZE TABLE

	Miami-Dade County, Florida		Census Tract 10.02, Miami-Dade County, Florida		Miami city, Florida
Label	Estimate	Margin of Error	Estimate	Margin of Error	
▼ Total:	606,448	±3,897	1,351	±206	
▼ Married-couple family:	383,616	±3,658	283	±105	
▼ With related children of the householder under 18 years:	167,207	±2,819	148	±94	
Under 6 years only	37,520	±1,423	27	±39	
Under 6 years and 6 to 17 years	30,190	±1,361	45	±61	
6 to 17 years only	99,497	±2,387	76	±61	
No related children of the householder under 18 years	216,409	±2,706	135	±80	
▼ Other family:	222,832	±2,836	1,068	±184	
▼ Male householder, no spouse present:	61,529	±1,706	90	±78	
▼ With related children of the householder under 18 years:	27,157	±1,306	66	±67	
Under 6 years only	7,901	±766	30	±49	
Under 6 years and 6 to 17 years	4,003	±519	0	±19	
6 to 17 years only	15,253	±981	36	±42	
No related children of the householder under 18 years	34,372	±1,340	24	±36	
▼ Female householder, no spouse present:	161,303	±2,718	978	±195	
▼ With related children of the householder under 18 years:	88,386	±1,924	533	±132	
Under 6 years only	16,000	±1,076	131	±88	
Under 6 years and 6 to 17 years	16,095	±939	142	±101	
6 to 17 years only	56,291	±1,710	260	±121	

So now we'll use this number to calculate the percent. Take the number we just got for families with related children of the householder under 18 years and divide that by the total number found in the first line of the table. Then take that number and multiply it by 100 to get the percent. This is the percent of families with children under the age of 18 that you'll use. Please note that, since we did the calculations ourselves, we do not have ready access to the margin of error that exists for this percent that we calculated.

Let's use Miami-Dade County as an example. Take the estimates for the three family types with related children of the householder under 18 years— so the first one is 167,207; the next one is 27,157; and the last one is 88,386—so we add them together to get 282,750.

Under 6 years and 6 to 17 years	4,003	±519	0	±19	
6 to 17 years only	15,253	±981	36	±42	
No related children of the householder under 18 years	34,372	±1,340	24	±36	
▼ Female householder, no spouse present:	161,303	±2,718	978	±195	
▼ With related children of the householder under 18 years:	88,386	±1,924	533	±132	
Under 6 years only	16,000	±1,076	131	±88	
Under 6 years and 6 to 17 years	16,095	±939	142	±101	
6 to 17 years only	56,291	±1,710	260	±121	

That gives us .466. So now we'll take that and multiply it by 100. That gives us 46.6. So, this means that 46.6% of families in Miami-Dade County have children under the age of 18.

It may take a few moments for the map to populate, but once it does, you'll see a map that outlines the different MSAs in the country. Navigate to Florida to view the map of the Miami-Fort Lauderdale-Pompano Beach MSA.

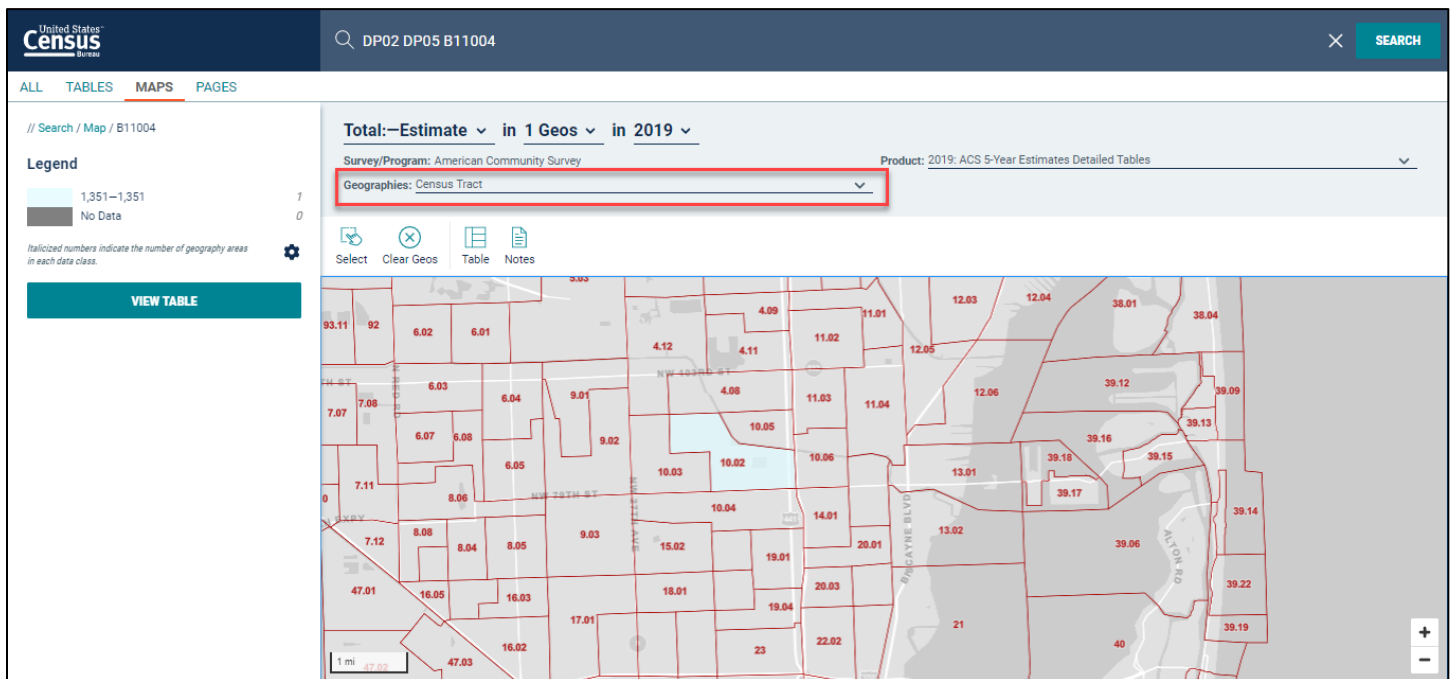

You can use either Ctrl + P to print this map, or you can use a screen capture software to capture the image. To view a map of one of the other geographies, use the Geographies menu found at the top of the table. If we switch it to County, for example, the map will automatically update to display Miami-Dade County.

You can do the same thing to view Miami city by switching it to Place...

...or tract 10.02 by switching it to Census Tract.

As you have seen, between tables DP02, DP05, and B11004, you can quickly get all the data that's required to complete the AFHMP.

I hope you found this helpful! Thank you.
